Early Cable Advices Show London Depressed by Disquieting News From China-Consols at a Decline -Railways Weak With a Few Exceptions-Coal and Traction Steady

NEW YORK, June 6.- The early cable advices this morning showed London sharply depressed in comparison with yesterday's figures. The extreme decline in consols extended to three-quarters of a point and losses approximating that figure appeared in the American quarter. The noteworthy decline in consols was reported owing altogether to the uneasiness growing out of the existing unsettled state of affairs in China and, at all events, there was no news from South Africa which would account for the tendency of the security in question.

The other of the European stock markets were heavy also, under the same influence, so it may be assumed that the Chinese situation is regarded as extremely grave by foreign statesmen and capitalists. On this account, also, the sales in this market for foreign account attained a larger total than for a number of days, fully 25,000 shares of various stocks being disposed of here, with the heaviest selling appearing in the Atchison issues.

These circumstances combined with the current tendency of local speculative opinion produced a quite unsettled and cer-tainly irregular stock market during the course of the business session.

London listed stocks, as was to be exvanced presumably in sympathy with a very sharp rise in Jersey Central, the course of the latter stock being attended by further rumors that the control of the company was being acquired by a connect-ing line in pursuance of the same general policy which has already brought all the important Eastern railway companies under the control of one or the other of the two great trunk line systems.

Apart from the railway list, the most

apart from the railway list, the most pronounced declines took place in Tennessee Coal and Iron and tobacco stocks. The movements in Sugar were irregular and limited, although the stock again furnished a disproportionate share of the day's total dealings. Comparatively firm features of the market aside from the anthracite group, were the local traction shares, and People's Gas. Of the large number of statements of railway traffic submitted today the majority of the roads reporting made good showings, but the reess were rather more ir-

regular than have appeared of late. Today's figures of the dealings between the banks and the Sub-Treasury since last Friday show a loss to the former considerably in excess of \$2,500,000, chiefly because of the return to the Treasury of funds held on Government account. But, notwithstanding this circumstance the local money market was altogether unruffied, and there were no changes of any importance in any of the other features of the situation. There was, indeed, a rather sharp advance in wheat, but the rise there had little reflection in the dealings in the

Broadly speaking the dealings were identical with those of the past few days, in that outside interest was almost at a standatill, while even the professional element of the boardroom were indisposed to trade except upon the appearance of pool manipulation in one quarter or another.

London was a rather heavy seller of American securities all day yesterday, the total balance probably being at least 30,000. Some of the sales represented liquidation, and some undoubtedly business on the short side for New York houses. The legitimate selling in London was owing to the situation in China, which, rightly or wrongly, the foreign markets seem to con-sider a very grave one. Its effect more than offset the news of the occupation of Pretoria. On this side, from the opening of the market, speculation followed the lead of London. The market was profesional almost entirely, and the profes-ionals have all turned bears on the theory that "the good news is all out" and the public have refused to come into the mar-het. The only strong feature of the nitua-tion technically is the very apparent fact that the real holders of securities refuse to sell, and probably will continue to do so. The outlook is uncertain, but not bad in any event, for holders of securities and speculators are amply protected. Probably a continuation of the professional see-saw market should be looked for at present market should be looked for at present with a tendency toward a higher level rather than a lower. News on this side is good. Congress has adjourned. There has been no anti-trust legislation. Earnings, both railway and industrial, continue excellent in almost every case. Money will remain abundant. Importations of gold are likely in the near future. The Atchison likely in the near future. The Atchison dividend has been declared, and the Northern Pacific common stock dividend will be shortly. Reports from the iron trade are encouraging. Purchases on the declines of international securities and the steel and iron stocks are to be advised.

The losses in the international group were naturally most important yesterday, owing to the London selling. Atchison was sold to the extent of 15,000 shares on was sold to the extent of income sames on the other side, and the bears attacked it in New York as well. The decline from 73 1-4 at the opening to 72 1-8 at the close was not large under the circumstances. There is excellent reason for being bullish There is excellent reason for being bullish on this stock, and if it is hammered down much further there will be large invest-

WHOLESOME ADVICE

For People Whose Stomachs Ar Weak and Digestion Poor. Dr. Harlandson, whose opinion in dis-enses is worthy of attention, says when a man or woman comes to me complaining of indigeration, loss of appetite, sour stone h,

belching, sour watery-rising, headannes, sleeplersness, lack of ambition, and a gen-eral can down hervous condition, I advise em to take after each meal one or two of Etuart's Dyspepsia Tab et; allowing the tablet to dissolve in the mouth, and thus ningle with the food eaten. The result is that the food is specially digested before it has time to sour and ferment. These tab-lets will digest the food anyway whether the stomach wants to or not, because they contain harmless digost ve principles, veg-etable essences, pepsin and Gold in Seal, which supply just what the weak storach

I have advised the tablets with great success, both in curing indigestion and to build up the tissues, increasing fl sh in thin nervous patients, whose real trouble was dyspepsia, and as soon as the stomach was put to rights, they did not know what sick-

A fifty cent package of Stuart's Dyspepsia Tablets can be bought at any drug store and as they are not a secret patent medi-cine, they can be used as often as desired with full assurance that they contain noth ing harmful in the slightest degree; on the contrary, anyone whose stomach is at all deranged will find great benefit from the use of Stuart's Dyspepsia Tablets. They will cure any form of stomach weakness or disease except cancer of the stomach.

ment buying. Shrewd buyers of securities ment buying. Shrewd buyers of securities realize that 5 per cent preferred railway stocks are not to be had often for \$72 a share. The return on the investment made at this price is more than 7 per cent, which, with call money at 1 3-4 and time loans at 3 and 4, must be considered very good. There has been some talk among the bears (because they can think of nothing also to say) over the large reductions. ing else to say) over the large reductions in operating expenses on the Atchison dur-ing the past year. It is suggested that sufficient money has not been expended pected, were weak. An exception, how-ever, was furnished by Reading, which ad-vanced presumably in sympathy with a very sharp rise in Jersey Central, the liberal. The figures show that large sums have, in addition, been expended out of earnings for improvements that might very properly have been charged to capital ac-count. The company has earned above account. The company has earned above actual operating expenses at least 5 per cent on preferred and 5 per cent on common stock. Nothing short of a revolution in business should now endanger the preferred dividend. What is to be looked for is a fine winter wheat crop and continued handsome increases in earnings for some months to come at least.

Burlington sold off from 129 at the open-ing to 128 1-4, the closing and lowest price of the day. Rock Island sold down to 106 1-2 and closed on the bottom. St. Paul sold down to 115 1-2 and closed at 115 7-8. The annual meeting of the Rock Island Company occurred yesterday. There was certainly nothing unpleasant in the meeting. After making all deductions, including 4 per cent paid on the stock, \$2,420,000 surplus for the year remains. The total income for the year was \$23,52,000, an increase of \$1,573,000. There is much bearishness emong the professionals. much bearishness among the professionals recarding Burlington, which it is said is selling entirely too high, compared with St. Paul and Rock Island. The stock may decline, but it should not be forgotten that there have been hints from excellent sources that the Union Pacific-Northwest crowd is buying the stock. There are ex-cellent reasons why these lines should desire to have an important voice in the affairs of Burlington. The company has seemed inclined recently to push westward and assume a more and more pron inent position in the Pacific field. Th 'community of ownership' plan, which has solved so many railway problems both East and West during the past six months, can very conveniently be invoked now to prevent the Burlington from building parallel lines.

Earnings statements generally are good The Chesapeake and Ohio gross earnings for the fourth week of May increased \$41,-239 and for the month increased \$130,950. The Mexican Central earnings for the week increased \$119.748, for the month increased \$309,316, and for the period since January 1 increased \$1,289.943. The Mis-souri Pacific gross earnings for the fourth week increased \$32,000, for the month in-creased \$87,000, and from January 1 in-creased \$1,002,250. The Central Branch The Central Branch for the month increased \$9,000. The St. Louis and Southwestern for the week decreased \$20,400, for the month decreased \$22,200, and from July 1 increased \$29,522.

Jersey Central was practically the only stock on the list to show any buoyancy at any time. It opened at 120, advanced to 1217-8, and closed at the high price. The story in the street, apparently founded on facts, was that the line is to be leased to the Baltimore and Ohio. What the deon facts, was that the line is to be leased to the Baltimore and Ohio. What the de-tails of the deal are does not develop, but there can be little doubt that it is part of the great plan of the Vanderbilt-Car-satt-Baltimore and Ohio syndicate to centrol the anthracite coal situation. One story was that the Jersey Central stock is to be guaranteed 5 per cent dividends. Reading was strong for a time, selling as high as 585-8, but it declined at the close to 571-4. The anthracite coalers look to be among the best purchases in the list on the reactions.

Sugar was firm for the greater part of the day, but made a small net loss, closing at 114 3-4. The statisticans figure that at the present prices of raw and refined much reported by the seaboard for exhe trust has a profit ranging besugar the trust has a profit ranging be-tween 82 1-2 and 95 cents a barrel. One authority reckons on a basis of .77 1-2 cents a pound difference between 4.62 1-2 each morning.

cents raw and 5.40 cents refined. It is provisions had a further advance, partsupposed that the cost of refining is 1-2 ly in sympathy with wheat, and closed trust will lay up surplus over the 6 per was good. cent paid to stockholders.

The steel securities generally were weak though there was some support and the net declines for the day were not large. Steel and Wire went off to 34 5-8, closing at the bottom. Federal Steel common opened at 32 5-8, and closed at 33 3-4, after selling as low as 33 3-8. Tennessee Coal and Iron turbled from 72 to 70, and closed practically at the bottom. Colorado Fuel closed half a point higher than it opened Notwithstanding all the bear talk regard-ing these securities there is no good reason for selling them at their present level and the chances are large that their next important movement will be an advance. The statement was made yesterday by an authority that the Steel and Wire Com-pany will open several of its mills during the present month owing to a greatly in-creased demand for wire and other steel products recently. The other companies will be following suit shortly if information from good sources can be relied on. It should be borne in mind that the wire common stock will sell ex-dividend 1 3-4

The Pacific securities went off with the grangers, and all closed the day with net losses. Southern Pacific was one of the weak features, closing below 34. Northern Pacific common went off to 593-8 and closed at the bottom, despite the confident prediction that it will be put on a 4 per cent dividend basis next week.

The securities of the big Eastern syndicate lines held their own as well as any on the list, and New York Central made a small net gain for the day. Central sold as high as 131 1-8 at one time, and closed at 130 7-8. The Baltimore and Ohio secur-

ities went off, but not by any means as rapidly as might have been expected in such a market after their recent rapid advance. The common stock closed at 78 3-4 and the preferred at 81 1-2.

The Southern Railway securities were also weak. Louisville and Nashville made an especially poor showing with an open-ing at 795-8, the high price for the day, and a close at 781-2, the lowest.

RED TAPE APPLICATIONS

Illustrations of Its Working in English Official Life.

Flagrant Cases Brought to Light During the War-The First Message to Methuen-Trouble Abou n Peg on Which to Hand a Cont-A Funny American Incident

A month or two ago the commanding of ficer of a volunteer corps, desiring to have the services of a worthy and respected clergyman as chaplain, sent in his name to the War Office. In reply he received a form of printed questions as to age birthplace, character, and qualifications Among them was the following: "Has the applicant ever been in prison, and, if so, for what offence?" The idea of crime in connection with his reverend friend seem ed so absurd to the colonel that he left th question unanswered. Red tape, in the person of a War Office clerk, looked at it in a different light. The blank in the form suggested to him only one thing, and that was official. "We note that you give no answer to Question No. -," he wrote to the colonel. "We hope this does not imply that the person you name has been convicted. We shall be glad of a definite answer on this point." Here detachment from ideas is merely

ludicrous. It has, however, another side, Early in January a battalion was ordered to the front which was short of officers The colonel, knowing that the twin battalion in India was exactly the reverse wrote to the War Office explaining the cir umstances, and urgently requesting that the full strength of his command might be made up by an exchange, the officers being sent direct to Durban. In great anxiety he waited a week without a reply. The day before he left his own letter was returned to him, and across it a red tape official had scrawled in blue pencil; "This application should be sent in duplicate." The battalion therefore sailed from Southampton short of officers, with perhaps unfortunate consequences in the field. But red tape knows nothing about actual-

its; its limits are bounded by form. Even in South Africa the red tape fiend is at large. When communication was first established between Kimber.ey and Lord Methuen's column on the Modder River it fairly outdid itself. The town, which had already borne some of the rigors of the siege, was naturally anxious to hear news of the relieving fores, or, at any rate, to receive some acknowledgment that it was invested by the Boers. Greatly to its disinvested by the Boers. Greatly to its dis-appointment and indignation, this was the first message flashed to Colonel Kekeai.h: "Please inform the Remount Department, Wynberg, what is the number marked on the left hoof of horse supplied by Sergeaut O'Gorman." To the depressed garrison of Kimberley this message sounded like mockery of their sufferings, but it was merely a display of real tage.

merely a display of red tape.
On the authority of Mr. Rhodes, another story is told of officialism in Kimberley Throughout the siege the miliary sutherities failed to rece the death of a single colonial, though locally raised focts were the main strength of the garrson. Nevertheless, in the Kimberley garrison orders occurs a notification to the effect that "Mule No. — having died, is here-by struck off the strength of the North Lancashire Regiment." To red tape a transport animal of the regular army is of more consequence than many troopers and officers of a regular corps.

An official not so long ago went some little distance from London on public busi-ness. On his return he sent in a bill of the expenses he h d incurred on the journey. One item was the small sum of threepence, opposite which, for want of a bet-ter term, he wrote "porter." To his as-tonishment the bill was returned to him with an intimation that no allowance was made for liquors. He explained that he paid the money, not for a drink, but to a station porter for carrying his bag to the train. This was satisfactory; nevertheless, to save future misunderstandings, he was asked to fill in the item as porterage.

When a peg to hang an overcoat on Is needed in an ordinary office, either one of the clerks puts it in or a workman is asked to do it. Such simple and direct methods find no favor in a world ruled by red tape, as the following incident illustrates. The necessity for a row of pegs on the door of a room in a public building having arisen, an application to that effect was sent in to the board of works. It wes returned on the ground that the wrong department had been consulted. The en-gineering department at Woolwich was next tried and with better success for in due course an official traveled up to Lon-don, at considerable cost to the taxpayer, to see what was required to be done. This was the preliminary to business, which, after some delay, appeared in the form of a mechanic, who put up the pegs. Thus a small job, which might have been done for a few pence, cost as many pounds in the interest of red tape.

A colonial official, who held an appoint-

ment in a protectorate, was offered an-other in the Western Pacific, which he accepted. To get over the ground be bad been given an allowance for a horse, forage, and a groom, an allowance which, It was decided, was to be continued in his new sphere of work. Unfortunately a horse was not required in a group of widely scattered coral islands, neither was forage, nor a groom. He, therefore, asked the red tape fiend in Downing Street if he might keep a small yacht instead, as otherwise it would be impossible for Lim to get about. Permission was readily to get about. Permission was readily granted, and the Western Pacific official gayly took up his new duties. But he reckoned without red tape. In making out the schedule of his expenses he wrote down so much for the wear and tear of the yacht, and so much for the skipper. Months later it came back to him with the trate demand of a red tape clerk as to whether he "supposed that the Government pro-vided him with a pleasure yacht." In justifying himself he pointed out that unless he hired a man to look after his vacht it might be stolen on his frequent absences inland, and in any case he required some one to keep it clean. He had merely used the word skipper for want of a better term. The explanation was perfectly satis-factory, but he was thereafter requested to write yacht so much, forage so much

It was more convenient! Fortunately, when red tape comes in con Fortunately, when reliable comes in contact with common sense it is red tape which goes to the wall. A good story is told of an American military secretary who devised a system which compelled everyone who went on business to General Banks to procure a ticket from a member of the staff, the presentation of which at the door gained his admission. One day a burly celonel of an Eastern regiment came to the door of the private office at head. to the door of the private office at head quarters and requested that his name be given to the general. "Have you a ticket?" he was asked. "A ticket!" echoed the colonel with scorn. "No, sir, I haven't." "You can't enter here without one," was the reply. "Sir," said the colonel, "when General Banks becomes a puppet show, and I have 25 cents to spare, I'll buy a ticket to see him—not before." He was admitted.-London Globe,

LEGAL NOTICES.

(Filed June 6, 1909.—J. R. Young, Clerk)
F. S. KEY SMITH, Solicitor.
IN THE SUPPEME COURT OF THE DISTRICT
OF COLUMBIA, HOLDING AN EQUITY
COURT FOR THE SAID DISTRICT.—J. ED.
WARD CHAPMAN, COMPLAINANT, VS. THE
UNKNOWN HEIRS OF URIAH FORREST,
BENJAMIN STODDARD, AND ROBERT S.
PATTERSON, Equity No. 214S.
On motion of F. S. Key Smith, solicitor for the
complainant, it is, by the court, this sixth day
of June, 1999, ordered that the above-named defendants, namely, the unknown heirs, devisees,
and aliences, respectively, of Uriah Forrest, Benjamin Stoddard and Robert S. Patterson, and
each of them, cause their appearance to be entered
herein on or before the first rule day occurring
forty days after this date; otherwise this cause
will be proceeded with as in case of default:
Provided, a copy of this order be published in
the "Washington Law Reporter" and in The
Times once a week for three successive weeks
before said rule day. The object of this suit is
to quiet the title of the complainant to part of
lot numbered eleven in square numbered two hundred and thirty, in the City of Washington, District of Columbia, and to enjoin the above-named
defendants, and each of them, their heirs and assigns, from setting up, claiming, or asserting any
title thereto.

(Seal.) A.-B. HAGNER, Associate Justice

ESTATE OF JOSEPH ALLEN, DECEASED.

No. 8810. Docket 25.

William C. McKinney, administrator, has, with the approval of the Supreme Court of the District of Columbia, holding a special term for Orphans' Court business, appointed PRIDAY, JUNE 29, 1000, at 1 O'CLOCK P. M., as the time and said court room as the place for passing of claims and making payment and distribution under the court's direction and control: when and where all creditors and persons entitled to distributive shares or legacies or a residue are notified to attend in person or by agent or attorney duly authorized, with their claims against the estate properly vouched: Provided, this order be published once in each of three successive weeks before said day in the "Washington Law Reporter" and The Washington Times.
